

Bug Report for Mahfil

1. Signup> signup with mail> send OTP> set the OTP box> after setting the OTP its not working automatically. Here I need to press the send button. If it works automatically it will be very user friendly.
2. Signup > input mobile number> if the user tries to sign up without a mobile number he can do it. This is the wrong process.
3. Signup > input mobile number>if the user tries to wrong/unverified phone number he is able to do it. That is wrong.
4. Rate us > if the user tries to rate the “mahfil” app it leads to the play store but does not find any rating option. Here showing the old review.
